LeetCode — Portfolio

Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and backend development. Proficient in Java and Python with experience building REST APIs, database-backed applications, and scalable software systems. Passionate about solving algorithmic problems and developing reliable software.

Skills

Languages: Java, Python, C, SQL, JavaScript

Core CS: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks

Backend: FastAPI, REST APIs, Modular Architecture

Databases: MySQL, MongoDB, SQLite

Cloud & Tools: AWS (Lambda, API Gateway, DynamoDB, EventBridge), Docker, Git, GitHub, IntelliJ, VS Code

Problem Solving: 214+ LeetCode problems solved

Projects

Banking Management System

Sep 2025 - Nov 2025

Core Java | SQLite

[GitHub](#)

- Designed and developed a modular banking system using Java, JDBC, and SQLite following object-oriented design principles.
- Implemented ACID-compliant transaction workflows, input validation, exception handling, and CRUD operations for reliable data management.

Open Source Voice AI

Jan 2026

Python | MongoDB

[Deployed link](#)

- Developed and deployed a scalable voice AI backend using Python, MongoDB, and REST APIs.
- Built asynchronous processing workflows, integrated external APIs, and performed testing and debugging for reliable real-time processing.

Leadership & Technical Experience

PRAJNA – AI-Powered Faculty Management Platform

Faculty Data Modules Lead

- Leading backend development for faculty data modules in a 24-member engineering project using AWS Lambda, API Gateway, DynamoDB, REST APIs and modular backend design principles.
- Working on JWT authentication workflows, DynamoDB schema planning, asynchronous processing pipelines, API testing with Postman, and AWS EventBridge-based event-driven integration concepts for scalable backend systems.
- Participating in SDLC activities including LLD documentation, debugging, integration planning, structured testing workflows, and collaborative development using Git.

GitHub Tech Club

President

- Conducted technical workshops, collaborative coding initiatives, and open-source activities for under graduate students as part of the GitHub Tech Club.

GirlScript Summer of Code 2026

Ambassador & Contributor

- Contributing to open-source initiatives and community-driven development programs while supporting technical engagement activities.

Internships & Certifications

Infosys springboard virtual Internship

September 2025-November 2025

- Developed a CLI-based banking simulator using Core Java and JDBC, focusing on OOP concepts and database operations.

Google Cloud Arcade

Aug 2025 – Sep 2025

- Completed hands-on labs in cloud infrastructure, networking, and deployment.

Achievements

NTSE Scholar (Cleared Stage 1 & 2 conducted by NCERT) — Top 5 Finalist – AI Agent Building Competition by Lyzr AI (2025)

Education

- B.Tech CSE, Gandhi Institute of Technology and Management (2023–2027) — CGPA: 9.5/10
- PUC, IIIT RK Valley — 10/10
- SSC, Sri Chaitanya Techno School — 596/600
