LeetCode — Portfolio

Summary

Computer Science undergraduate with strong foundations in Data Structures & Algorithms, Object-Oriented Programming, and full-stack development. Experienced in Java, Python, Spring Boot, FastAPI, React, REST APIs, MongoDB, and AWS, with hands-on experience building secure and scalable backend systems.

Skills

Languages: Java, Python, SQL, JavaScript, TypeScript, C

Frontend: React.js, HTML, CSS

Backend: Spring Boot, FastAPI, REST API Design

Core CS: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks

Databases: MySQL, MongoDB

Cloud & Tools: AWS (Lambda, API Gateway, DynamoDB, EventBridge), AWS CDK, Docker, Git, GitHub, VS Code

Problem Solving: 277+ LeetCode problems solved

Projects

Full-Stack Banking Simulator Platform

Java 17 — Spring Boot — MongoDB — React

Spring Security — JWT — Docker

[GitHub](#) — [Live Demo](#)

- Built a secure banking platform with layered Spring Boot REST APIs, JWT authentication, BCrypt password hashing, and role-based access control.
- Implemented reliable deposit, withdrawal, and fund-transfer workflows with transactional consistency, automated statement generation, and asynchronous low-balance email alerts; containerized the backend using Docker.

JobTrack – Job Application Tracker

Java 17 — Spring Boot — MongoDB — React

TypeScript — Spring Security — JWT — Docker

[GitHub](#) — [Live Demo](#)

- Developed a secure job-tracking platform with Spring Boot REST APIs, JWT authentication, user-scoped data access, and MongoDB persistence.
- Designed a dynamic recruitment pipeline supporting default and custom interview stages with automatic positional reordering, alongside MongoDB-based dashboard analytics for application progress.

Experience

PRAJNA – AI-Powered Faculty Management Platform

Faculty Data Modules Lead

TypeScript — AWS CDK — Lambda — DynamoDB — EventBridge

[GitHub](#)

- Led backend development for Faculty Data Modules (M7–M12), designing serverless microservices using TypeScript, AWS CDK, Lambda, and API Gateway with Infrastructure as Code.
- Designed DynamoDB Single Table schemas with multiple GSIs to support role-based views, cross-campus queries, and efficient entity lookups without table scans.
- Built event-driven integrations using EventBridge and SQS with tenant-isolated service communication; collaborated through Git/GitHub workflows including branching, pull requests, code reviews, and integration testing.

GitHub Tech Club

President

- Conducted technical workshops, collaborative coding initiatives, and open-source activities for undergraduate students as part of the GitHub Tech Club.

GirlScript Summer of Code 2026

Ambassador & Contributor

- Contributed to open-source projects through feature development, issue resolution, and community-driven development while supporting technical engagement as an ambassador.

Internships & Certifications

Infosys Springboard Virtual Internship

September 2025–November 2025

- Strengthened Core Java fundamentals through hands-on development, applying OOP principles, exception handling, collections, JDBC, and database integration.

Google Cloud Arcade

Aug 2025 – Sep 2025

- Completed hands-on labs in cloud infrastructure, networking, and deployment.

Achievements

NTSE Scholar (Cleared Stage 1 & 2 conducted by NCERT) — Top 5 Finalist – AI Agent Building Competition by Lyzr AI (2025)

Education

- B.Tech CSE, Gandhi Institute of Technology and Management (2023–2027) — CGPA: 9.5/10
- PUC, IIT RK Valley — 10/10
- SSC, Sri Chaitanya Techno School — 596/600
